Introduction

This document provides a listing of all spare parts that can be ordered for maintenance or repair of your B applicator.

The illustration shows a 4" right version of the B applicator mounted to a printer. Most parts are identical for the 6" version and for the left version, and whenever there is a difference this is indicated.

The following tools may be required when replacing parts on this machine:

Hex key set (1.5, 2, 2.5, 3, 4, 5, and 6mm)	Source Locally
Side cutting pliers	Source Locally
Open jaw spanner set (8, 10, 12, 13, 14, 16, 17, 20 and 24mm)	Source Locally
Electronics screwdriver set, flat and Phillips	Source Locally
Metric nut spinners (5.5mm)	Source Locally
Outside circlip pliers (5mm)	Source Locally

Spares Levels

- Level 1** - Basic wear and tear items which customers could hold on site plus consumable items.
- Level 2** - Main critical items to the operation of the applicator which could be replaced by a fully trained customer.
- Level 3** - Any other items not included in the above. These would be held by Domino/ Mectec trained engineer only.

Preventive maintenance

We recommend that the following wear and tear part is used for preventative maintenance. Replacement intervals will vary according to application.
