# QuickDesign Unite

For intelligent, streamlined operations

QuickDesign Unite is a software solution which streamlines operations by integrating product coding and marking activities into wider business planning systems.

QuickDesign Unite enables higher level information systems, such as Manufacturing Execution Systems (MES) and other control systems to drive production-line coders via a simple file interface. Based on a powerful print controller, which runs as a Windows service, *QuickDesign Unite* provides best-in-class reliability, configurable interfaces and a scripting language which makes it possible to customise according to business rules and work processes.

Integration of coding equipment to higher level IT systems provides significant efficiency improvements and substantially reduces the need for operator involvement by automating coder message set-up.

Triggered by MES or ERP instructions, *QuickDesign Unite* gets the right code onto the right product at the right time.

Turn to *QuickDesign Unite* for:

Complete automation and operational efficiency	Integrates directly to MES or to ERP through control modules
Reduced risk of operator errors	Full automation removes the need for operator screens and line-side data entry
Flexible, highly configurable solution	Configurable 2 way *.xml and *.csv file interfaces, ODBC connectivity and custom scripting
Best-in-class reliability	Windows® service print controller for maximum uptime
Scalability and future-proofing	Configurable from a single PC and coder to a site-wide solution
Simplicity	Single application for all coding and marking technologies
